

Homework 4 Reflection

Glen Madsen

March 8, 2018

1. In retrospect, what could you have done better to reduce the time you spent solving this assignment?

I could have developed a better understanding of designing a test suite case beforehand, but I didn't think it was too bad.

2. What could the Principles of Software staff have done better to improve your learning experience in this assignment?

I thought this homework was fairly easy, more discussion over testing beforehand would have been helpful though.

3. What do you know now that you wish you had known before beginning the assignment?

I wish I had known what I will have to use this for in the future so I could choose a design off of more than just guessing and what is easy.
