Homework 7 Reflection

Glen Madsen

April 17, 2018

1. In retrospect, what could you have done better to reduce the time you spent solving this assignment?
I had to restructure my additional data structures a couple of times because I didn't think far enough ahead.

2. What could the Principles of Software staff have done better to improve your learning experience in this assignment?
Some slightly better documentation on the model-controller-view before hand would have been nice.

3. What do you know now that you wish you had known before beginning the assignment?
The data structure really is not made to handle multiple data types that shouldn't be sorted being stored in EdgeLabel. But it was an interesting problem to solve nonetheless
